MEMORANDUM FOR: Chief, CIA/PID(NPIC)

SUBJECT : DDI Meeting on T-KH Center - 14 December 1962

25X1

1. [redacted] called a meeting on 14 December 1962, to discuss the status of the DDI plan to extend the use of T-KH material more generally throughout the DDI area.

25X1

2. [redacted] read a letter from General Carter granting the DDI offices permission to proceed with plans for expanding the use of T-KH material within the present limits of the COMINT area. He authorized the granting of additional clearances to carry out this concept.

The letter also went on to note that analysts would be permitted to integrate finished T-KH materials in their files. This would not include the so called raw materials such as film, mosaics, etc., which would have to be kept in a vaulted area.

25X1

3. [redacted] then requested that reports be prepared by mid-January 1963 on the following:

25X1

a. Badges, security, etc., - [redacted] of Security office.

25X1

b. Document Control and additional copies of NPIC and other PI reports, etc., - [redacted] OCR. [redacted] indicated that he would contact Mr. Lundahl about the additional copies of reports.

25X1

c. Receipt of cables by the Watch Office - [redacted] OCI.

25X1

25X1

4. [redacted] advised the group that the logistics could not begin before 1 February 1963, because of previous commitments and that the Center would probably not become operational before 1 March 1963.

##### 5. COMMENTS

It is too early to predict with any degree of certainty what impact this new Center concept will have on the LS/PID. I do believe though that it would be safe to generalize some. For instance, a large increase

25X

~~SECRET~~

REPORT

25X1

in the number of people cleared for access to the materials in the T-KH system is bound to reflect in a greater workload, not only on LS/PID, but on all of NPIC. This has already become apparent in a limited way as a result of the clearance of some [redacted] additional OCI and OSI analysts during the past 2-3 weeks.

25X

I believe that a re-orientation of the LS/PID effort might be in order as the Center becomes operational. For example, were OCR to select and distribute the T-KH material for the DDI offices, our Control Clerks would gain some time. On the other hand there would probably be a greater emphasis on liaison and requirements services as well as conferences and briefings provided by the PI's.
